Professor Thrupiece's Hand

FOREWORD

TO THE 2017 EDITION

It gives me enormous pleasure to introduce new readers to the groundbreaking *Elementary Glossary of Culinary Bioethiocal Terms* written by the great late Professor (then Dr) Brian Thrupiece in 1964 in circumstances of considerable hardship during his time at The Technical College of Danang.

In these enlightened times it is difficult to imagine a world in which the study of Culinary Bio-ethics held only the moist tenuous fingerhold in our great universities, so it is a pleasure and a duty to record the enormous influence that this volume had in securing the fledgling science and allowing it to flourish as it surely does today.

Since Professor Thrupiece wrote this volume, there has been much progress and the world is greatly changed; yet modern-day students as well as people of intelligence will still derive much from a careful study of it.

Alongside the original printed pages we have taken the opportunity to reproduce Professor Thrupiece's original manuscripts for surely some of the excitement of creativity can be discerned in his hand?

I believe so.
