HOW A BRITISH KID
SAW OUR FUTURE

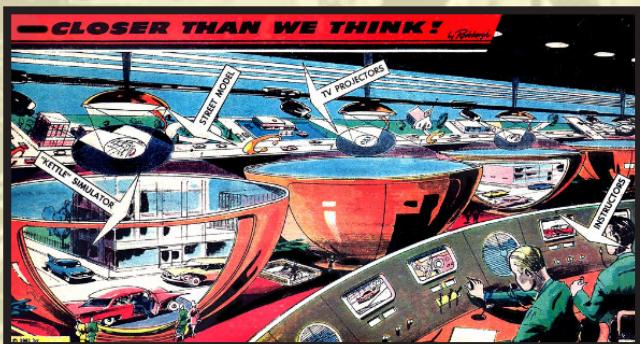

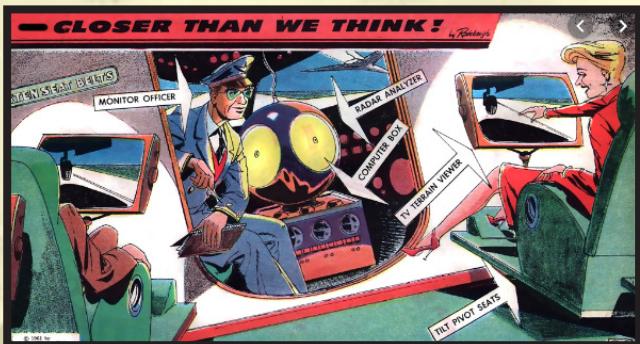

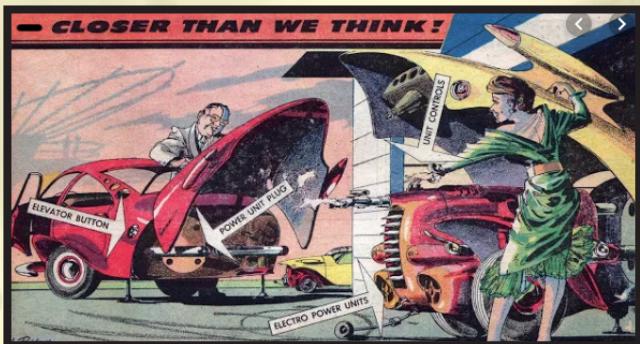

NOSTALGIA EDITION

CLOSER THAN YESTERDAY

A selection of pages and ideas from the future have arrived from the fertile brain of your host. Some are the work of Ms Audrey Edwards, some closely with the Professor over the years. This young man has advanced the concept of time travel lines between present and future. He's a real guy from the backwoods of Dorset.

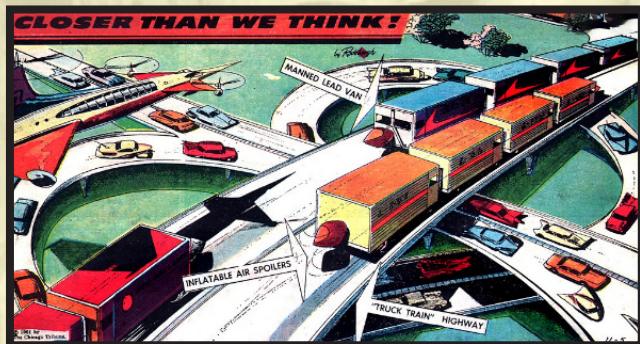

1942

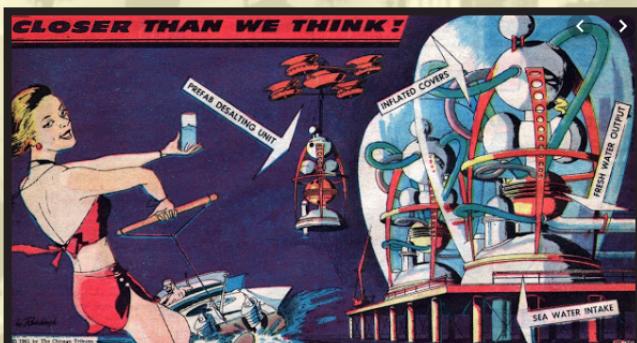

BRIAN PEMBERTON CHARLEYWOOD THOMAS was educated first at The Grammar School Buntingford, then at Jesus College, Cambridge, from which he graduated in Biochemistry. He was encouraged to undertake research by Kenwood Cheffe, Cambridge's leading bio-chemist. The title of his thesis "Household fluff: a viable dietary supplement" was of his findings via The thrupiecediet™ provided him with a PhD awarded the PhD degree in 1964. After Cambridge, Brian brought a strong physical presence and a sense of humour to generations of students first in the The Technical University Assistant Lecturer 1964-1968); an Associate Lecturer (University Lecturer 1968-1984); the University of Cambridge and the Institute for Advanced Research in Culinary Bioethics; the Pierre-Wok Professor of Culinary Bioethics; and finally the Royal Society of Culinary Bio-ethics (RSCB).

AN WE THINK YEAR'S FUTURE

from the 1950s. Though many design Brit Professor Brian Thrupiece, Badminton-Court who has worked the last decade or so. Surely no cause of science nor blurred the future as successfully as this young Westshire, England.

BRUPIECE was born on 1st April 1940 and at Combe (Dorset) and later at Magdalene College, Cambridge, where he graduated in 1961 with a 3rd class degree in Engineering. He undertook research under the supervision of Dr. Brian Thrupiece, a leading ethics pioneer. Brian gave an able defence of the "monetary staple in times of conflict" (monetarization of the economy formed the basis of his later wealth) and he was appointed to teach at Cambridge. In Cambridge he taught in various institutions, which gave him an even stronger sense of bemusement to the local population. After leaving Cambridge he taught at the Technical College of Danang (Demonstrator and Lecturer 1964-1968) and later at the Polytechnic Institute of Yazd (Iran 1968-1972), the University of Cobija (Senior Lecturer 1984-1996) and the University of Toormakeady (Tuar Mhic Éadaigh) (Ciaran Ó Catháin 1997-2004). He was a founder member of the Society for the Study of British Economic History (SCBE).
